

You can make 1kg strong hash in 15 minutes with only some cheap tableware. Please, follow our instruction.

I. STEP – heat and mix

1. Put the 1kg hash product into the microwave oven and heat it for 3 minutes/750watt
2. Add the 70g chemicals to the hot hash product
2. Mix the chemicals with the hot hash product (use a fork)

Accessories:

- 1kg hash product
- 70g chemicals
- Microwave save bowl
- Fork
- Spoon

Comments:

- Use only microwave save bowl!
- Save your hands and use gloves!
- Mix the chemical with the hash product perfectly!
- Heat and mix again if necessary!

II. STEP – press and pack

1. Put the 1kg hot and mixed hash product into the foodbox
2. Close the foodbox
3. Press it by hand

Accessories:

- Ladle
- Foodbox (1000 ml)

Comments:

- The hash product become solid after cool down
- The solid hash will be ready to cut
